

Audit Passport Summary

Rule readiness score: 66/100

PyMC readiness probability: 33% (90% CI 12%-58%)

Six open data-quality findings were recalled from the track01_data_rescue.csv review set. Two themes dominate audit readiness risk: (1) transactional chronology and inventory integrity exceptions (Critical/High severity) and (2) master-data and modeling ambiguities that weaken traceability and reporting consistency (High/Medium severity). The most audit-sensitive exception is repeated instances where ship_date precedes production_date (F-DC-002), which directly challenges process chronology and may drive cut-off testing failures. Additional High-risk issues include negative quantities (F-DC-003), customer_id values not present in the customer master file (F-DC-001), and conflicting quantities for the same entity across records (F-DC-005). Medium risks include unit semantics ambiguity where quantity is paired with 'mm' (F-DC-004) and potential duplicate row signatures with an acknowledged evidentiary conflict pending verification (F-DC-006). All findings remain open and are marked for triage.

Top Audit Passports

F-DC-002 | Critical | Risk 95 | FindingCard

Affected:
Why it matters:
Action: Pending triage.
Evidence: track01_data_rescue.csv row 48, ship_date=2024-10-29
Evidence: track01_data_rescue.csv row 465, ship_date=2025-12-29
Evidence: track01_data_rescue.csv row 1405, ship_date=2025-12-09

F-DC-003 | High | Risk 90 | FindingCard

Affected:
Why it matters:
Action: Pending triage.
Evidence: track01_data_rescue.csv row 939, quantity=-445
Evidence: track01_data_rescue.csv row 2563, quantity=-164
Evidence: track01_data_rescue.csv row 3823, quantity=-32

F-DC-005 | High | Risk 87 | FindingCard

Affected:
Why it matters:
Action: Pending triage.
Evidence: track01_data_rescue.csv row 3, quantity=592
Evidence: track01_data_rescue.csv row 4, quantity=826
Evidence: track01_data_rescue.csv row 7, quantity=4137

F-DC-001 | High | Risk 80 | FindingCard

Affected:
Why it matters:
Action: Pending triage.
Evidence: track01_data_rescue.csv row 3, customer_id=CX-A228
Evidence: track01_data_rescue.csv row 51, customer_id=CX-G153
Evidence: track01_data_rescue.csv row 87, customer_id=CX-E185

F-DC-004 | Medium | Risk 71 | FindingCard

Affected:
Why it matters:
Action: Pending triage.

Evidence: track01_data_rescue.csv row 2, unit=mm
Evidence: track01_data_rescue.csv row 3, unit=mm
Evidence: track01_data_rescue.csv row 4, unit=mm

F-DC-006 | Medium | Risk 60 | FindingCard

Affected:

Why it matters:

Action: Pending triage.

Evidence: track01_data_rescue.csv row 26, record_id=R-00025

Evidence: track01_data_rescue.csv row 40, record_id=R-00039

Evidence: track01_data_rescue.csv row 46, record_id=R-00045

Sign-off Note

This report is generated from semantic memory cards, evidence pointers, and agent handoffs. Manual review remains required for unresolved audit blockers.
